Emergency Planning Guide

Preparedness for Homeowners

The most important feature of any home is something you might not see when you walk through the door. But it could save your life. It's safety. And it comes in all shapes and sizes: A home disaster plan, smoke detectors; fire extinguisher; escape routes; a home disaster supply kit, carefully maintained heating and electrical systems and knowing what to do and where to go in case of fire, flood, tornado or other disaster.

Home Preparedness Guide – The Plan

- Discuss emergency procedures and hold practice drills with your family.
 - Establish a location where your family will re-unite if separated.
- Post emergency telephone numbers.
 - Include a contact out of town that everyone will know to call if separated.
- Assemble and store a home disaster supply kit (Visit the local Red Cross or go to www.ready.gov for a comprehensive list of recommended items).
- Determine evacuation routes and alternate routes from your area.
- Know where main utility switches and cutoffs are and learn how to turn them off.

Severe Weather Safety

- Be sure to keep a transistor radio or weather alert radio - with working batteries.
 - Tune your radio to KCJB AM 910, KYYX 97 FM
 - Television: tune to KXMC channel 13 (3 on cable) or KMOT channel 10 (7 on cable)
- Pay close attention to weather reports. Know the difference between a watch (when conditions are ripe for a severe weather event) and a warning (when a severe weather event is occurring or is imminent).

MOBILE HOMEOWNERS: When a tornado warning has been issued, leave your manufactured home immediately.

Mobile homes are particularly vulnerable to severe weather, particularly tornadoes. A mobile home can overturn very easily even if precautions have been taken to tie down the unit. When a tornado warning is issued, take shelter in a building with a strong foundation. If shelter is not available,

lie in a ditch or low-lying area a safe distance away from the unit.

- Because of the relative rapid onset of severe weather, mobile home owners are encouraged to coordinate shelter with nearby friends or relatives who have basements or other sturdy structures.
- The City of Minot will open a shelter at Edison School (701 17th Ave SW) during Tornado Warnings.

Weather Safety in a Sheltered building/home:

- Go at once to a windowless, interior room; storm cellar; basement; or lowest level of the building.
- Get away from the windows.
- If there is no basement, go to an inner hallway or a smaller inner room without windows, such as a bathroom or closet.
- Go to the center of the room. Stay away from corners because they tend to attract debris.
- Get under a piece of sturdy furniture such as a workbench or heavy table or desk and hold on to it.
- Use arms to protect head and neck.

Home Fire Safety

- Be sure you have properly operating smoke detectors and fire extinguishers.
- Insure your personal property. Shop around for a company that best meets your needs for renters or home owner's insurance.
- Plan, with the whole family, at least two escape routes from your home.
- Practice fire drills regularly, using a smoke detector as a signal to start the drill. Follow your escape plan!

Emergency Planning Guide

Home Fire Safety continued

- **Deter Fire:** Keep matches and lighters away from small children. Children tend to be curious about fire and tend to hide when frightened. Fire drills are most important for children between the ages of 2 and 12.
- **Maintain:** Be sure your heating and electrical systems are properly maintained and in good working order.
- **Don't overload:** Carefully follow the instructions on all appliances and heating units, taking special care not to overload your electrical system.
- **Holidays:** Be especially careful that your holiday decorations are safely displayed.
- **Store important documents,** such as birth certificates, marriage licenses and insurance papers, in a fire-proof box or in the refrigerator, or rent a safety deposit box at your local bank.
- **If there is a fire:** always crawl close to the floor in smoke.
- **Feel each door for heat** before opening it.

- If your clothing catches on fire, stop, drop to the floor and roll over and over again to put out the flames.
- Call the fire department from a neighbor's phone. Leave your home before calling for help.

Flood Safety

- If your home is located in a flood hazard area, be prepared to go to a safe place on high ground when flood or flash flood warnings are issued for your area.
- Most standard residential policies do not cover flood loss. In flood-prone communities, the National Flood Insurance Program makes flood insurance available for manufactured homes on foundations. See your insurance broker for details.

For More Information:

City of Minot: <http://minotnd.org/Departments.htm> Click on "Fire Department" and then on "Emergency Info." During actual disasters this page will contain specific information and advice from various response agencies.

Ward County Emergency Management: <http://www.co.ward.nd.us/emergency-management/> provides all hazardous planning resources.

First District Health Unit: www.fdh.u.org Choose "Hot Topics" or "Emergency Response."

N.D. Department of Emergency Services (NDDDES): www.nd.gov/des Click on "Get Ready, Get Set, Get Safe" for planning/awareness information.

Federal Emergency Management Agency: www.fema.gov for comprehensive preparedness information.

US Department of Homeland Security (DHS): www.ready.gov offers complete emergency planning for your family.

Red Cross (National): www.redcross.org

Local Red Cross: www.minotredcross.org

The "constant" Red Cross call center phone number is 858-9366. This number is active only during major emergencies of large proportions or long duration.
